

EASYUPGRADES for EASYLABEL® February 2015

Version number breakdown example

Orange = Major Version Green = Maintenance
Yellow = Minor Version Blue = Build

Minimal Upgrades (free of charge)

Build and Maintenance Releases are considered Minimal Upgrades and are always free of charge between Major Upgrade releases.

- **Build Releases:** Major Version and Minor Version numbers stay the same. Only the Build Release number changes. For example, the first release of **EASYLABEL 6.2** is 6.2.0.**1805**. The next Build Release number could be 6.2.0.**1856**. This is a free upgrade.
- **Maintenance Releases:** In the example above; for version 6.2.**0**.1805, the next Maintenance Release number could be 6.2.**1**.1856. This is a free upgrade.

In both examples above, as long as your current version begins with “6.2”, any Minimal Upgrades beginning with “6.2” may be downloaded from Tharo’s website free. If you are not sure what version upgrade you are entitled to, please use our free app: ELWIBUVersion.exe

Note: app does not exist-completion March 2015

Major Upgrades (paid upgrades)

Minor and Major Version Releases are considered Major Upgrades and require replacement of the Remote Context File (.RTC license key file). A Major Upgrade is when one of the first two digits in the EASYLABEL version number changes.

- **Minor Version Release:** The second number in the EASYLABEL version changes. For example, updating from EASYLABEL 6.**3** to 6.**4** is considered a Major Upgrade.
- **Major Version Release:** The first number in the EASYLABEL version changes. For example, updating from EASYLABEL **6**.x to **7**.x is considered a Major Upgrade.

Any Major Upgrade or new EASYLABEL purchase *additionally* entitles you to the next chronological Major Upgrade free of charge. For example, purchasing or upgrading to EASYLABEL 6.3 entitles you to 6.4 free of charge.

EASYUPGRADES for EASYLABEL® February 2015

Other Upgrades

The following upgrade purchases are NOT eligible for a free upgrade to the current EASYLABEL version (unless you *additionally* purchase a **Major Upgrade**):

- Customers upgrading a Feature Level (i.e. Gold to Platinum)
- Customers purchasing Additional Users for EL Multi-User (i.e. 5 Users to 10 Users)
- Customers purchasing Additional Printers for EL NetPrintServer
- Customers purchasing Additional XML Seats for EL Platinum

A “Major Upgrade” may be purchased in conjunction with any of the “Other Upgrades” listed directly above.

To our EASYLABEL 4 and earlier customers interested in upgrading, your software was purchased between 11 and 30+ years ago. The newest version of EASYLABEL will still support all your current/old label formats and databases (even back to DOS versions). Upgrades to EASYLABEL 6 must be purchased at full suggested list price.

How to Purchase

The cost of a Major Upgrade depends on what the Feature Level you own (i.e. Gold, Platinum, Terminal Server, etc.). Depending on the type of upgrade you need, you can start using your new version of EASYLABEL within the same day of purchase; after receiving the e-mailed .RTC file. Tharo Systems does not sell directly to End Users. We have a worldwide network of Authorized EASYLABEL Resellers who will assist you with the upgrade process. To be referred to an Authorized EASYLABEL Reseller in your area or if you have any questions, please contact:

+1 800 878 6833 sales@tharo.com US and Canada
+1 330 273 4408 easylabel@easylabel.com Worldwide

Requirements

For a Major Upgrade, you will need:

1. Payment made to your Authorized EASYLABEL Reseller
2. EASYLABEL 5 or higher on Windows XP or newer
3. A Remote Context File (created from your existing version’s license key).

Instructions on creating a Remote Context File can be found here:

<http://www.tharo.com/addon.pdf>

4. Internet/e-mail access to send and receive the Remote Context File and to download the latest version of EASYLABEL (DVD’s for EASYLABEL software upgrades will not be shipped)
